

# Personalisation

## SELECT THE SOLUTION YOU NEED

Which device will be best? Do you choose a standard SAIK KEY, or perhaps an additional SAIK LOCK, plus three SAIK BOXinBOX boxes, five SAIK KEYinBOX boxes, one SAIK POSTAL box and more? It's possible - all SAIK devices can work together as one unit or one system. Decide for yourself what you need.

## ADDITIONAL EQUIPMENT

Make the SAIK cabinet a dedicated combo for your company.

Choices include:

- **STRENGTHENED CASE** - Standard, or weather resistant IP56, and for devices placed in unattended areas around the clock, choose devices with an intrusion resistance rating of RC2, RC3 or S1.
- **DEVICE OPERATION SCREEN** - 7, 10 or 21-inch touchscreen display. Located on the side or underneath the device.
- **BUILT IN CAMERA** - photographs or records people and events in front of the unit (can be placed inside the box).
- **UV-C RADIATORS** - protect workers by neutralising the threat of viruses and bacteria.
- **BREATHALYSER** - prevents irresponsible employees from taking keys (especially from vehicles).
- **INTERNAL** or **EXTERNAL** purpose of the device.
- **WEIGHT SENSOR** or **OPTICAL SENSOR** inside the locker.
- Reading information about items from the **RFID TAG / QR CODE**.
- Locker **SIGNATURE PLAQUE**.
- **LINING** the inside of the locker with non-slip material to prevent scratches and bruises on items.

Resistance class  
weather conditions:

**IP50**

Burglary resistance class:

**RC2 RC3 S1**

Space for a plaque with signature lockbox 90x50mm

## TAKE CARE OF THE DESIGN

SAIK cabinets are chosen by the most prestigious public and private institutions from Polish and the world also because that they look great in modern interiors

- Choose an existing project or design the device according to Your vision together with our designer

**SAIK** Designer [www.saik.pl/designer](http://www.saik.pl/designer)

- We will paint each element of the enclosure in the RAL color of your choice.
- Choose a deposit box with solid or glazed doors.
- Standard VSG 33.1 strengthened glass, P2 or P4 strengthened. The panes can be transparent, milky or mirrored.
- Choose a LED-backlit engraved image on the door, a full-color sticker with your own logo, or replace the glass with a multimedia screen!
- If you want - we can laser burn your logo on the housing.
- Possibility of finishing the device with wood.

RAL standard palette

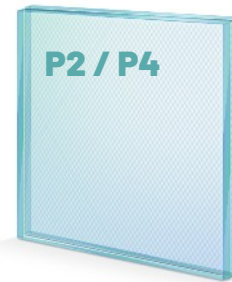

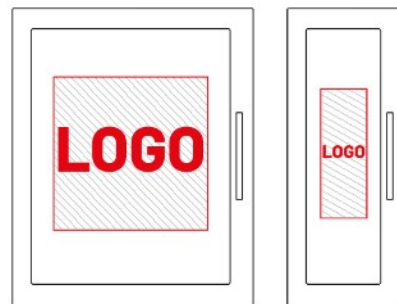

Depozytor zabudowany

Examples of logos placed on doors:

Logo placement area

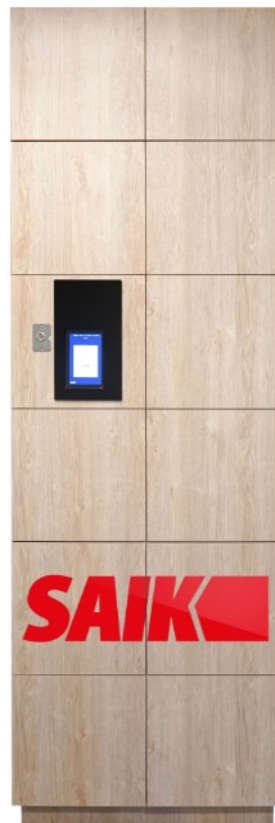

P2 2x4mm + 2 layers of foil  
P4 2x4mm + 4 layers of foil

VSG 33.1  
2x3mm + 1 layer of foil

Wood and sticker finish

Door types: full metal, milky glass, mirrored glass, clear glass

Laser-cut logo in the housing with backlight capability

Locker with combination lock
